PROFILE

iOS and Flutter developer who has worked on 8 projects since May 2024. During software internships at Uplide Teknoloji and Dijital Gen, worked on Flutter mobile app development, REST API integration, UI development, bug fixing and testing; contributed to existing Flutter apps in freelance and volunteer projects. My personal iOS game Blokla, built with Swift and SwiftUI, is in App Store review. Management Information Systems student at Istanbul Topkapı University.

EXPERIENCE

Freelance Flutter Developer — PetJoo
Jun 2025 – Oct 2025 (4 months)

- Fixed bugs and carried out improvements in the existing app.
- Made changes that improved the interface and user experience.
- Coordinated with the project team and contributed to preparing stable releases.

Flutter Training & Volunteer Flutter Developer — İyiliği Kodlayanlar
Jan 2025 – Jan 2026 (1 year)

- First 6 months · student: hands-on training in Dart, Flutter, Firebase, REST APIs, Git/GitHub and clean code
- Last 6 months · volunteer developer: Flutter development in a team building a social-impact app

Software Intern — Dijital Gen Yazılım
Oct 2024 – Jul 2025 (10 months)

- Mobile app development with Flutter and REST API integrations
- UI development and refinement
- Bug analysis, bug fixing, testing and maintenance
- Teamwork with Git/GitHub
- Products worked on: GenSight (Corporate work tracking and task management app); ARBooks (Augmented-reality-powered children's story platform); GenFollow (Product tracking and process management web panel)

Software Intern — Uplide Teknoloji
May 2024 – Oct 2024 (6 months)

- Took on backend integration, UI development and bug fixing tasks.
- Took part in testing, ran performance evaluations and wrote feedback reports.
- Identified technical issues that came up during development and proposed solutions.
- Products worked on: İşim Sağlık (An app connecting job seekers and employers, with listings, messaging and video calls); Social-Up (An app where field teams photograph and upload the service work they've done)

Technical Service — Aidata Bilişim

Jun 2021 – Jan 2024 (2 years 8 months)

- Diagnosed and fixed hardware and software issues; maintained computer and network systems.
- Worked with the team in the production of tender products, mainly computer assembly.
- Coordinated with the project team to improve product quality and speed up delivery.

PROJECTS

Blokla! — Personal project · iOS

Swift, SwiftUI, Swift Package

- A calm but snappy block puzzle where you place pieces on a grid and clear rows and columns. The project where I'm going through the whole product development process, from idea to app.
- SwiftUI interface, with a testable Swift Package core that keeps game rules apart from the UI
- A theme system offering different looks
- Turkish and English localization
- In App Store review

Alışveriş Kapsülü — Personal project · Flutter

Flutter, Dart, Firebase, REST API

- A mobile shopping experience that lists products, filters them by category and lets users save favourites.
- Product listing, category filtering and favourites
- User and data management with Firebase Authentication and Cloud Firestore
- Dynamic data flow through REST API integration

EDUCATION

Management Information Systems — Istanbul Topkapı University

1st year · ongoing

Information Technologies Program — Şehit Öğretmen Fatma Nur Çelik Vocational and Technical Anatolian High School

Graduated · Istanbul · Sep 2021 – Jun 2025

SKILLS

- **Used in internships and projects:** Flutter & Dart, REST API, Firebase, SQLite
